

Summary Prospectus

August 31, 2018

Toreador Select Fund
Investor Class Ticker: TOSLX
Institutional Class Ticker: TOSZX

Before you invest, you may want to review the Fund's Prospectus, which contains more information about the Fund and its risks. You can find the Fund's Prospectus, Statement of Additional Information and other information about the Fund online at www.toreadorfunds.com. You may also obtain this information at no cost by calling 800-673-0550. The Fund's Prospectus and Statement of Additional Information, both dated August 31, 2018, are incorporated by reference into this Summary Prospectus.

Toreador Select Fund

Investment Objective

The investment objective of the Toreador Select Fund (the “Select Fund”) is long-term capital appreciation.

Fees and Expenses of the Select Fund

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund.

Shareholder Fees <i>(fees paid directly from your investment)</i>	Investor Class	Institutional Class
Redemption Fee as a % of amount redeemed (if applicable, for shares redeemed within 60 days of purchase)	2.00%	2.00%
Maximum deferred sales charge (load) (as a percentage of the NAV at time of purchase)	None	None
Annual Operating Expenses <i>(expenses that you pay each year as a percentage of the value of your investment)</i>		
Management Fees	0.90%	0.90%
Distribution (12b-1) and Service Fees	0.25%	None
Other Expenses		
Shareholder Services Plan	0.24%	0.07%
Other Expenses	<u>0.91%</u>	<u>0.70%</u>
Total Other Expenses	<u>1.15%</u>	<u>0.77%</u>
Total Annual Fund Operating Expenses ⁽¹⁾	2.30%	1.67%
Less Fee Waivers and/or Expense Reimbursements ⁽¹⁾	<u>(1.30%)</u>	<u>(0.92%)</u>
Total Annual Fund Operating Expenses After Fee Waivers and/or Expense Reimbursements ⁽¹⁾	<u>1.00%</u>	<u>0.75%</u>

(1) The Adviser has entered into a written expense limitation agreement under which it has agreed to limit the total expenses of the Select Fund (exclusive of interest, expenses incurred under a plan of distribution adopted pursuant to the Rule 12b-1 under the 1940 Act, taxes, acquired fund fees and expenses, brokerage commissions, dividend expenses on short sales, and other extraordinary expenses not incurred in the ordinary course of business) to an annual rate of 0.75% of the average daily net assets of the Select Fund. Each

waiver and/or reimbursement of an expense by the Adviser is subject to repayment by the Select Fund within three years following the date such waiver and/or reimbursement was made, provided that the Select Fund is able to make the repayment without exceeding the expense limitation in place at the time of the waiver or reimbursement and at the time the waiver or reimbursement is recouped. This expense limitation agreement may not be terminated prior to August 31, 2019 unless mutually agreed to in writing by the parties. Prior to October 1, 2017, the Adviser had agreed to limit the total expenses of the Select Fund (with the same exclusions noted above) to 0.95% through August 31, 2019.

Example:

The following example is intended to help you compare the cost of investing in the Select Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Select Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year, and that the Select Fund’s operating expenses remain the same. The effect of the Adviser’s agreement to waive fees and/or reimburse expenses is only reflected in the first year of each example shown below. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

Share class	1 Year	3 Years	5 Years	10 Years
Investor Class	\$102	\$593	\$1,112	\$2,535
Institutional Class	\$77	\$436	\$821	\$1,899

For both share classes, your expenses would be the same as in the table above if you did not redeem your shares at the end of each period.

Portfolio Turnover

The Select Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in Total Annual Fund Operating Expenses or in the example, affect the Select Fund’s performance. During the most recent fiscal period ended April 30, 2018, the Select Fund’s portfolio turnover rate was 211.64% of the average value of its portfolio.

Principal Investment Strategies

The Select Fund invests primarily in equity securities of U.S. companies whose market capitalizations are, at the time of purchase, similar to those in the S&P

500® Index. As of May 31, 2018, the S&P 500® Index was composed of companies having market capitalizations of between \$3.66 billion and \$923.8 billion.

Equity securities in which the Select Fund may invest include common and preferred stocks, rights and warrants, and securities convertible into equity securities.

The Select Fund may also invest in the securities of other investment companies including ETFs.

In choosing investments, the Adviser employs a proprietary stock selection model that ranks stocks according to fundamental criteria that the Adviser believes are indicative of company strength and superior risk/return profile. These criteria may include intrinsic value, management quality, leverage and free cash flow, earnings quality, return on assets, return on equity and return on capital. The Select Fund will normally invest across a majority of the economic sectors represented in the S&P 500® Index, in approximately the same percentages as each such sector is represented in the Index. Although the Select Fund will focus on large capitalization securities, the Fund may invest in securities across all market capitalization ranges.

The Select Fund will normally hold between 35 to 65 securities in its portfolio.

The Select Fund may have a high degree of turnover in its investment portfolio, which may increase its costs and adversely affect the Select Fund's performance.

The Adviser will typically sell a company from the Select Fund's portfolio when indicated by the proprietary stock selection model described above or when the Adviser elects to take a temporary defensive position.

From time to time, the Adviser may take temporary defensive positions, which are inconsistent with the Select Fund's principal investment strategies, in attempting to respond to adverse market, economic, political, or other conditions. For example, the Select Fund may hold all or a portion of its assets in money market instruments, including cash, cash equivalents, U.S. government securities, other investment grade fixed income securities, certificates of deposit, bankers acceptances, commercial paper, money market funds and repurchase agreements. While the Select Fund is in a defensive position, the opportunity to achieve its investment objective will be limited.

Principal Risks

Risk is inherent in all investing. A summary description of certain principal risks of investing in the Select Fund is mentioned below. Before you decide whether to invest in the Select Fund, carefully consider these risk factors and special considerations associated with investing in the Select Fund, which may cause you to lose part or all of your investment in the Select Fund. There can be no assurance that the Select Fund will achieve its investment objective.

Equity Securities Risk - Since the Select Fund invests in equity securities, it is subject to the risk that stock prices will fall over short or extended periods of time. Historically, the equity markets have moved in cycles, and the value of the Select Fund's equity securities may fluctuate from day to day. Individual companies may report poor results or be negatively affected by industry and/or economic trends and developments. The prices of securities issued by such companies may suffer a decline in response. These factors contribute to price volatility, which is a principal risk of investing in the Select Fund.

Market Risk – The value of securities in the Select Fund's portfolio will fluctuate and, as a result, the Select Fund's share price may decline suddenly or over a sustained period of time. The equity securities purchased by the Select Fund may involve large price swings and potential for loss.

Management Risk – The strategies used by the Adviser may fail to produce the intended result.

Large Cap Risk – Larger, more established companies may be unable to attain the high growth rates of successful, smaller companies during periods of economic expansion.

Risks of Investment Selection and Asset Allocation - The Select Fund's investment success depends on the skill of the Adviser in evaluating, selecting and monitoring the portfolio assets. If the Adviser's conclusions about growth rates or securities values are incorrect, the Select Fund may not perform as anticipated.

Risk of Other Equity Securities -

Convertible Securities. Convertible securities are subject to the risks and price fluctuations of the underlying stock. They may be subject to the risk that the issuer will not be able to pay interest or dividends when due and their market value may change based on changes in the issuer's credit rating or the market's perception of the issuer's creditworthiness. Some convertible preferred stocks

have a conversion or call feature that allows the issuer to redeem the stock before the conversion date, which could diminish the potential for capital appreciation on the investment.

Preferred Securities. The fixed dividend rate of preferred stocks may cause their prices to behave more like those of debt securities. If interest rates rise, the value of preferred stock having a fixed dividend rate tends to fall. Preferred stock generally ranks behind debt securities in claims for dividends and assets of the issuer in a liquidation or bankruptcy.

Rights and Warrants. The price of a warrant does not necessarily move parallel to the price of the underlying security and is generally more volatile than that of the underlying security. Rights are similar to warrants, but normally have a shorter duration. The market for rights or warrants may be very limited and it may be difficult to sell them promptly at an acceptable price. Rights and warrants have no voting rights, receive no dividends and have no rights with respect to the assets of the issuer.

Investment Company Securities Risk - When the Select Fund invests in other investment companies, including ETFs, it indirectly bears its proportionate share of fees and expenses of the other investment company, which results in higher Fund expenses. The Select Fund may be affected by losses of the other investment companies and the level of risk arising from their investment practices. ETFs are subject to additional risks, such as the fact that an ETF's shares may trade at a market price that is above or below its net asset value or an active market may not develop for shares of the ETF.

ETF Risk - ETFs generally are investment companies whose shares represent an interest in a portfolio of securities. Some ETFs are designed to track various market indexes. Because the Select Fund may invest in ETFs, it is subject to additional risks that do not apply to conventional mutual funds, including the risks that the market price of an ETF's shares may trade at a discount to its NAV, an active secondary market may not develop or be maintained, or trading may be halted by the exchange in which they trade, which may impact the Select Fund's ability to sell its shares.

Portfolio Turnover Risk - The Select Fund may, at times, have a portfolio turnover rate that is higher than other stock funds. A high rate of portfolio turnover increases brokerage and other expenses, which are borne by the Select Fund and its shareholders. A high portfolio turnover rate can also result in higher current realization of capital gains and a potentially larger current tax liability.

Performance Information

The Select Fund recently commenced operations and, as a result, does not have a full calendar year of performance history. In the future, performance information will be presented in this section of the Prospectus. Performance information will contain a bar chart and table that provide some indication of the risks of investing in the Select Fund by showing changes in the Select Fund's performance from year to year and by showing the Select Fund's average annual returns for certain time periods as compared to a broad measure of market performance. Investors should be aware that past performance is not necessarily an indication of how the Select Fund will perform in the future.

Updated performance information is available by calling toll-free 1-800-673-0550.

Investment Adviser

Toreador Research & Trading, LLC serves as the investment adviser to the Select Fund.

Portfolio Managers

Mr. Paul Blinn and Mr. Rafael Resendes have served as the Portfolio Managers to the Select Fund since the Select Fund's inception in June 2016.

For important information about purchase and sale of fund shares, tax information and financial intermediary compensation, please turn to the sections of this prospectus entitled "Purchase and Sale of Fund Shares", "Tax Information" and "Payments to Broker-Dealers and Other Financial Intermediaries".

GENERAL SUMMARY INFORMATION

Purchase and Sale of Fund Shares

You may purchase, redeem or exchange shares of the Funds on any business day, which is any day the New York Stock Exchange is open for business. You may purchase, redeem or exchange shares of the Funds either through a financial adviser or directly from the Funds. The minimum initial purchase or exchange into the Investor Shares of the Core, Explorer and Select Funds is \$1,000 and \$2,500 for the Investor Shares of the International Fund. Subsequent investments must be in amounts of \$100 for Investor Class shares. The minimum initial purchase or exchange into the Institutional Shares of the Core, Explorer and Select Funds is \$10,000 and \$100,000 for the Institutional Shares of the International Fund. Subsequent investments in Institutional Shares must be in

amounts of \$100 or more for the Core, Explorer and Select Funds and \$10,000 or more for the International Fund. The Funds may waive minimums for purchases or exchanges through employer-sponsored retirement plans.

Tax Information

The Funds intend to make distributions that may be taxed as ordinary income or capital gain, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account, in which case withdrawals will be taxed.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Funds through a broker-dealer or other financial intermediary (such as a bank), the Funds and their distributor may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other financial intermediary and your sales person to recommend the Funds over another investment. Ask your sales person or visit your financial intermediary's website for more information.
